Summary & Response Document

Course code and name: Data Analysis (STATS4052) 2018-19

Response rate: 23 of 54 (42.6%)

Summary of Student comments	Date comment received	Response from Academic Staff	Expected completion date (if required)	Action Owner
The "shiny" walkthroughs for the labs were excellent. Very helpful and relatively fun to do. The course itself helped me understand R and my other modules better.	April 2019	Thank you for the positive feedback on the presentation of the course material.	No action necessary	
The interactive online course to follow was easy to use and understand. Tutors were all very helpful when asked questions. The class tests, quizzes and group projects were very beneficial and evenly spread out throughout the semester.	April 2019	Thanks! It is good to know the material is easy to follow and understand. Also, that the spread of the assessments throughout the course is appropriate.	No action necessary	
Introduce R Markdown briefly in week 1 so we know what's coming. More example r markdown reports for different things might be useful.	April 2019	Introducing R Markdown in week 1 may be appropriate and help with preparation for the first class test, and hence we shall consider this for future years. We will also consider	Jan 2020	Staff

	introducing additional example reports written using R Markdown.		
The group project should not be worth as much as 25%.	The weight of each piece of assessed work will be reconsidered for next year.	Jan 2020	Staff
